REPAIR DAMAGE CAUSED BY THE SUN, TRAFFIC & ELEMENTS

BEFORE

AFTER

Asphalt cracking is caused by the effects of sun, moisture and ground movements. Asphalt is flexible when new, but with age it becomes rigid and is less able to tolerate traffic wear.

After repair, asphalt should be sealed and coated to protect against moisture and ultraviolet rays from the sun. This can double the life of your asphalt paving.

Before

After

- ◆ Asphalt Paving
- ◆ Concrete Repairs
- ◆ Slurry Seal
- ◆ Interlocking Paving Stones
- ◆ Petromat Overlays
- ◆ Sidewalk Grinding
- ◆ Hot Crack Seal
- ◆ Striping
