

Press Release

NEW ECO-FRIENDLY SLURRY SEAL

March 13th, 2009 4:00pm
Laguna Hills, CA

Quickel Paving announces its new strategic alliance with SealMaster of California. In a combined effort between the two companies we are proud to introduce a New Asphaltic Emulsion Slurry Seal product that is Eco-Friendly, a primary ingredient of this product is terminal ground recycled tire rubber. "With each gallon we can convert our products mix to determine the amount of tires that can be saved from land fills across the country! This is very exciting to us, to know that we have an opportunity to be able to do something that can help our future environment", says Dan Quickel owner of Quickel Paving!

Product Description...

MasterSeal MTR is a clay-stabilized mineral filled asphalt emulsion modified with Recycled Terminal Blended Tire Rubber for superior performance, U.V. Protection, Flexibility, Adhesion, Durability, and Color Retention. **MasterSeal MTR** is designed to protect and beautify all asphalt pavements including parking lots, driveways, airports, shopping malls, roadways, and more.

Professional Services Provided By Quickel Paving...

"By adding Quickel Paving to the list of our nationwide and world-wide network of qualified pavement maintenance professionals, we can assure optimum product performance and customer satisfaction. Together our joint marketing efforts and combined experience make for a perfect strategic partnership and we are very excited about our opportunities together", says Greg Farkas Owner and Operator SealMaster of California.
